DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 25-29 recite the limitations of "at least three ordered symbols..." . There is no support for this limitation in the specification. The three color components (paragraph 14) and the plurality (three or four) of color planes (paragraph 14) cannot be considered to imply or suggest the limitations of "... the at least the three ordered symbols..." .

2. Claims 25-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Furthermore, the limitations of " compressing said image by compressing said second and third bit planes together as a group, wherein said first bit plane is compressed separate from the combination of said second and third bit planes" is not shown in the drawings nor disclosed in the specification .

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2819

4. Claims 25-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Mark et al. (USP 5,303,313).

Mark et al. disclose a method of compressing digital image having a plurality of pixels (see Figs. 7A-E). The pixels are represented by a sequence of ordered symbols (see col. 4, lines 3-20) that guarantee that the symbols are occupying the same position in a respective ordered sequence of ordered symbols (see also col. 14, lines 12-22); the pixels (images) can be organized into bit planes (see col. 17, lines 4-10); run length encoding scheme can be used to compress the bit plane (see col. 2 lines 45-51). The compression scheme of Mark et al. can be use in a lossless encoding scheme using Human encoding algorithm to reduce the number of symbols in the bit plane (see col.1, lines 20-24).

Response to Amendment

5. The amendment filed on 12/20/2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "... at least three ordered symbols..." and " compressing said image by compressing said second and third bit planes together as a group, wherein said first bit plane is compressed separate from the combination of said second and third bit planes."

Applicant is required to cancel the new matter in the reply to this Office Action.

Response to Arguments

Art Unit: 2819

6. Applicant's arguments filed on 12/20/2005 have been fully considered but they are not persuasive. The rejection of the claims has been maintained. The added limitations have no support in the specification (see rejection above).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
